

THE MEL MARSHALL ENGINEERING SCHOLARSHIP

FOR UNDERGRADUATE OR GRADUATE CIVIL ENGINEERING STUDENTS

The Mel Marshall Engineering Scholarship

The Canadian Precast Concrete Institute and the Canadian Concrete Pipe & Precast Association are pleased to offer the Mel Marshall Engineering Scholarship, a scholarship to honour industry Titan Mel Marshall for his lifelong commitment to advancing the precast concrete industry by teaching younger generations about precast concrete products and assemblies.

The scholarship, available for engineering students, has a value of \$10,000 per year. The scholarship funds can also be matched to bring the total to \$20,000, pending approval of a second application by Mitacs.”

About Mel Marshall

Mel’s passion for education to inspire the next generation of industry experts was second to none and his voice will continue to be heard for decades through his mentorship and various publications. Mel’s zeal inspired member involvement and commitment to furthering the shared goals of the North American precast concrete industry and has left an indelible mark on colleagues and clients alike.

Through this scholarship, we wish to continue Mel’s legacy and celebrate his incredible achievements, leadership, dedication and outstanding training and mentorship to so many in the precast concrete industry.

Who is Eligible for this Scholarship?

This award is open to students enrolled in undergraduate or graduate Civil Engineering programs in an accredited Canadian University.

The following criteria must be met by the applicant:

- Applicants attending undergraduate studies must be in their fourth year at the time of application with the intention to pursue graduate studies in the precast-related research field.
- For applicants attending graduate studies, the research topic must be related to precast concrete.
- International students may apply as long as they are enrolled in an accredited Canadian University at the time of application and meeting all other criteria noted.
- Must be a full-time student during the entire scholarship year.
